

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ATCM I - Alternative Risk Premia - a sub-fund of ATCM I

class SEK (LU1655580576)

Management Company: SEB Fund Services S.A.

Objectives and investment policy

The sub-fund’s objective is to generate an attractive risk-adjusted return for its investors combined with low medium-term link/correlation to traditional asset classes such as company shares (equities) and bonds through investing in systematic investment strategies defined as Alternative Risk Premia.

Risk Premia in this context refers to the compensation that is earned by the sub-fund for assuming a particular market or factor risk if the situation evolves in the right direction. Examples of such Alternative Risk Premia includes the manager systematically buying undervalued stocks and selling short overvalued stocks (value premia) or the manager buying high yielding currencies and selling short low yielding currencies in order to capture the positive spread in interest rates (foreign exchange carry premia).

In order to achieve its objective, the sub-fund implements Alternative Risk Premia strategies globally through investments in a wide number of asset classes and financial instruments including equities, fixed income, foreign exchange, credit and volatility. For the avoidance of doubt these investments will not include asset-backed securities (ABS) or mortgage-backed securities (MBS). Most investments will be made in developed countries but the sub-fund may also invest into emerging markets.

Financial derivative instruments may be used as an integral part of the investment strategy as well as to reduce risks. These financial derivative instruments include over-the-counter transactions such as forwards, warrants, total return swaps, Contracts-for-Difference (CFDs) and/or exchange traded instruments, such as options and futures. The sub-fund may invest in derivatives linked to certain of these investment strategies but may also implement the strategies directly by systematically buying and selling securities.

The sub-fund can, from time to time, hold cash and money market instruments including money market funds, provided that in the case of cash no more than 20% of the sub-fund’s net assets will be deposited with the same counterpart.

The currency of the unit class is SEK.

Under normal circumstances, you may sell your units any day on which banks are open for business both in Luxembourg and Sweden.

These units are capitalisation units. Income and capital gains are reinvested.

Recommendation

This sub-fund may not be appropriate for investors who plan to withdraw their money within 2 years.

Risk and reward profile

Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- The sub-fund may use derivatives. Due to their structure, the risk associated with these investment instruments may have a larger impact on the value of the sub-fund, than buying the underlying stock or investment instrument directly.
- Counterparty risk: the risk that a counterpart does not fulfill its obligations to the sub-fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Emerging market risk: the sub-fund may be exposed to risk of countries and markets that have less developed political, economic and legal systems.
- Currency risk: the sub-fund may hold some of its investments in currencies other than the sub-fund’s reference currency. Thus the value of the sub-fund may rise and fall due to currency movements.
- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.

What does this synthetic risk and reward indicator mean?

- The units of class SEK are classified in category 4 because the value of the unit may be subject to medium variations and consequently the risk of loss and the opportunity of gain may be moderate.
- The risk category has been determined using the maximum risk limit allowed for this unit class. The risk category may not be a reliable indicator of the unit class’s future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.

Charges

The charges you pay are used to cover the running costs of the sub-fund, including the costs of marketing and distribution of units. These charges reduce the potential increase in value of an investment in this sub-fund.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charge	1.51%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown correspond to a maximum percentage which might be deducted from your capital invested into the sub-fund. In some cases you might pay less. You may contact your financial advisor or

intermediary to be informed on the actual entry and exit charges.

The conversion of some or all of the units into units of another sub-fund or another unit class is free of charge.

The ongoing charges figure shown here is an estimate of the charges as this unit class has not existed for an entire year; consequently, there is insufficient data available. The fund's annual report for each financial year will include detail on the exact charges incurred.

The figure of the ongoing charges excludes:

- Securities transaction charges, except for the charges related to the purchase and the sale of target funds.

For further information concerning charges, please consult the heading "Charges and expenses" of the fund's prospectus.

Past performance

There is insufficient data to produce a useful indication of past performance for the unit class.

This sub-fund was launched in 2015 and the unit class in 2017.
