This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## JRS SICAV 2 - JRS Global Edge - a sub-fund of JRS SICAV 2

class RC (SEK) (LU1321409010)

Management Company: SEB Fund Services S.A.

### Objectives and investment policy

The sub-fund aims to generate a higher risk-adjusted return than the global equity market.

In order to achieve its objective, the sub-fund on average invests 95% in equity instruments (equities, funds, ETFs, futures and options) or in instruments with similar risk characteristics, and on average 5% in fixed income instruments or in instruments with similar risk characteristics. Investments in equity related instruments may vary from 90-100% of the sub-fund's NAV. The sub-fund may also have exposure to alternative strategies and invest in corporate bond instruments (funds, ETFs, futures and options). Up to 10% of the sub-fund's assets may be invested in corporate bond related strategies and up to 10% in alternative strategies.

The sub-fund may invest in derivatives to achieve its investment objective and/ or to reduce risks.

The currency of the share class is SEK.

Under normal circumstances, you may sell your shares any day on which banks are open for business in Luxembourg, except 24 December.

These shares are capitalisation shares. Income and capital gains are reinvested.

#### Recommendation

This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

#### Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- Liquidity risk: low liquidity might result in that it would be difficult or impossible to buy or sell an investment instrument in a timely manner and that the price could be lower or higher than expected.
- Credit risk: the sub-fund invests directly or indirectly in interest bearing instruments, for example bonds. If an issuer of such an instrument cannot pay interest or the nominal amount at maturity, the investment can lose some or all of its value.
- Counterparty risk: the risk that a counterpart does not fulfill its obligations to the sub-fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Currency risk: the sub-fund may hold some of its investments in currencies other than the sub-fund's reference currency. Thus the value of the sub-fund may rise and fall due to currency movements.
- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.

#### What does this synthetic risk and reward indicator mean?

- The shares of class RC (SEK) are classified in category 5 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category for this share class was calculated using simulated historical data. The risk category may not be a reliable indicator of the share class's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited.

#### How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.

## Charges

The charges you pay are used to cover the running costs of the sub-fund, including the costs of marketing and distribution of shares. These charges reduce the potential increase in value of an investment in this sub-fund.
