JRS SICAV 2 - JRS Global Wealth - a sub-fund of JRS SICAV 2

class HNW (SEK) (LU0455662774)

Management Company: SEB Fund Services S.A.

Objectives and investment policy

The sub-fund aims to generate a risk controlled absolute return over the medium term.

In order to achieve its objective, the sub-fund invests 20-60% of its assets in instruments related to company shares (equities) including but not limited to, investment funds and exchange traded funds (ETFs). In addition the sub-fund may invest 0-65% of its assets in interest bearing instruments, including, but not limited to investment funds and exchange traded funds (ETFs), globally including emerging markets. Between 10-30% of the assets of the sub-fund may be invested in alternative strategies and 5-25% may be invested in corporate bond related strategies.

The sub-fund may invest in derivatives to achieve its investment objective

and/or to reduce the risks.

The currency of the share class is SEK.

Under normal circumstances, you may sell your shares any day on which banks are open for business both in Luxembourg and Stockholm, except 24 December.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This sub-fund may not be appropriate for investors who plan to withdraw their money within 2 years.

Risk and reward profile

Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- The sub-fund may use derivatives. Due to their structure, the risk associated with these investment instruments may have a larger impact on the value of the sub-fund, than buying the underlying stock or investment instrument directly.
- Counterparty risk: the risk that a counterpart does not fulfill its obligations to the sub-fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Emerging market risk: the sub-fund may be exposed to risk of countries and markets that have less developed political, economic and legal systems.
- Currency risk: the sub-fund may hold some of its investments in currencies other than the sub-fund's reference currency. Thus the value of the sub-fund may rise and fall due to currency movements.
- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.

What does this synthetic risk and reward indicator mean?

- The shares of class HNW (SEK) are classified in category 4 because the value of the share may be subject to medium variations and consequently the risk of loss and the opportunity of gain may be moderate.
- The risk category for this share class was calculated using simulated historical data. The risk category may not be a reliable indicator of the share class's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.
