Maj Invest Funds - Maj Invest Global Value Equities, Class AD EUR ISIN: LU1321539733

a sub-fund of Maj Invest Funds

Management Company: SEB Fund Services S.A.

Objectives and investment policy

The sub-fund aims to outperform its benchmark (MSCI World Index (Bloomberg ticker: NDDUWI)) including net dividend over a long-term period by investing mainly in US company shares (equities) but also other global equities.

In order to achieve its objective, the sub-fund follows a value based approach, taking into consideration the market position and long-term fundamentals of a potential company prior to investment, based on the strategy of selecting stocks that trade for less than their estimated intrinsic value and stocks of companies that are believed to be undervalued by the market.

The sub-fund may further invest in other financial instruments linked to equities. The sub-fund typically invests across multiple sectors and countries at any time.

The portfolio of the sub-fund consists of equities in minimum 25 companies.

The Investment Manager performs a semi-annual screening of the portfolio

in regards to the UN Global Compact's ten principles in the areas of human rights, labour, the environment and anti-corruption and the OECD Guidelines for Multinational Enterprises. The Investment Manager regularly compares the portfolio positions with relevant observation lists provided by third party.

The reference currency of the sub-fund is USD.
The currency of the unit class is EUR.

Under normal circumstances, you may sell your units any day on which banks are open for business in Luxembourg, except 24 December.

These units are distribution units. Income and capital gains may be distributed.

Recommendation

This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

What does this synthetic risk and reward indicator mean?

- The units of Class AD EUR are classified in category 5 because the value of the unit may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category for this unit class was calculated using simulated historical data. The risk category may not be a reliable indicator of the unit class's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free

investment - the risk of losing your money is small, but the chance of making gains is also limited.

Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- Currency risk: the sub-fund may hold some of its investments in currencies other than the sub-fund's reference currency. Thus the value of the sub-fund may rise and fall due to currency movements.
- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.
